10. CURRENT DATASET STATUS & SPATIAL VERIFICATION STATEMENT

The active dataset **Bengaluru — Ward 112 (Reference Dataset)** (Bengaluru — Ward 112 / Domlur) currently holds an audit status of **REVIEW REQUIRED**. A total of 48 of 64 parcels (75.0%) meet the strict dual-threshold criteria ($\text{IoU} \geq 0.85$ and Centroid Drift < 2.0 meters) and are certified for authoritative land record workflows. The remaining 16 parcels have been formally queued in the Conflict Ledger for surveyor inspection.

STATUTORY NOTICE: This document provides spatial geometry reconciliation, multi-source sensor agreement, and technical evidentiary verification only. It does not constitute a final judicial determination of legal title or ownership. Administrative registration of final boundaries must follow statutory procedures stipulated under the relevant State Land Revenue Act.

11. DATA SOURCES & RECONCILIATION METHODOLOGY

Methodological Architecture: Spatial reconciliation in TERRANODE employs an 8-signal scoring matrix (combining Intersection-over-Union, centroid offset, area delta, perimeter agreement, shape similarity, and bounding-box overlap) indexed with Shapely STRtrees. Coordinate references are validated in native projected UTM metric systems prior to comparison, eliminating angular degree distortion. Ground-truth verification uses Survey of India CORS GNSS stations as authoritative reference coordinates.
